PROFESSIONAL SUMMARY

Senior Software Engineer and Technology Leader with strong experience in designing, developing, and delivering scalable, secure, and high-performance software systems. Specialized in Java, Spring Boot, Angular, and Microservices Architecture, with hands-on expertise in AWS cloud deployment, Docker, and CI/CD pipelines. Proven ability to lead cross-functional teams, manage full software development lifecycles, and translate business requirements into robust technical solutions. Strong background in IT infrastructure, system reliability, and project management, enabling effective delivery of enterprise-grade systems and continuous technical improvement.

EXPERIENCE

AI Engineer (Automation integrated with Backend)

Jameia.com – Kuwait

Feb 2025 – Present

- Designed and developed AI-driven automation workflows integrated with backend systems to optimize business operations and reduce manual processes.
- Built and maintained backend services using Java and Spring Boot to support scalable automation solutions and system integrations.
- Implemented workflow automation using tools like n8n for task orchestration, notifications, approvals, and process management across departments.
- Integrated AI agents to handle repetitive business tasks, customer interactions, and internal operational processes.
- Developed RESTful APIs for communication between ERP modules, CRM systems, AI services, and third-party platforms.
- Managed authentication, role-based access control, and permissions for secure access across administrative dashboards and business systems.
- Worked on cloud deployment and infrastructure management using AWS, Docker, and CI/CD practices for stable production environments.
- Supported database design, optimization, and migration management using SQL databases and Flyway for version control.
- Collaborated with cross-functional teams to analyze business requirements and transform them into scalable technical solutions.
- Improved operational efficiency by connecting systems such as WhatsApp, email services, notifications, and reporting tools into centralized automated workflows.

Chief Technology Officer (CTO)

Dyar Hajer Consultants – Saudi Arabia

Aug 2025 – Apr 2026

- Defined and executed the company's technology strategy aligned with business goals and long-term growth.
- Led and managed cross-functional teams (Backend, Frontend, DevOps, QA).
- Designed and oversaw scalable system architectures using Microservices and Cloud-based solutions (AWS).
- Selected and governed the company's technology stack, tools, and infrastructure.
- Supervised the full Software Development Lifecycle (SDLC) from planning to deployment and optimization.
- Ensured system security, performance, scalability, and reliability.
- Deployed and managed applications on AWS using Docker and CI/CD pipelines.
- Established coding standards, architecture guidelines, and engineering best practices.
- Mentored engineering teams and drove continuous technical improvement and innovation.

Senior Software Engineer | Project Manager**Dyar Hajer Consultants – Saudi Arabia****Jul 2025 – Present**

- Led end-to-end software development projects from requirements gathering to production delivery.
- Designed, developed, and maintained scalable applications using Java, Spring Boot, and Angular.
- Managed project scope, timelines, milestones, and deliverables.
- Applied Agile / Scrum methodologies to manage sprints, backlog, and team productivity.
- Coordinated with stakeholders to translate business requirements into technical solutions.
- Conducted code reviews and ensured adherence to clean code and engineering best practices.
- Identified and resolved technical risks and delivery blockers.

Software Engineer**Armed Forces Agouza Rehabilitation & Rheumatology Center (ARRC) –****Cairo May 2024 – Jun 2025**

- Designed, developed, tested, and maintained internal software systems.
- Applied software engineering principles to solve real operational challenges.
- Participated in system analysis, implementation, and continuous improvement.
- Collaborated with stakeholders to deliver reliable and efficient solutions.
- Supported system optimization, debugging, and long-term maintenance.

IT Support Engineer**Armed Forces Agouza Rehabilitation & Rheumatology Center (ARRC) – Cairo****May 2024 – Jun 2025**

- Managed biometric attendance systems integrated with SQL Server databases.
- Maintained and monitored security camera systems.
- Provided help desk support for PCs, printers, and network issues.
- Ensured system reliability, data security, and minimal downtime.
- Troubleshoot hardware and software issues in high-availability environments.

Backend Developer**Infantry House in Armed Forces of Egypt – Cairo****Apr 2024 – May 2024**

- Developed and maintained high-performance RESTful APIs using Java & Spring Boot.
- Designed backend systems following MVC and Microservices architecture.
- Optimized application performance, scalability, and reliability.
- Ensured clean code principles and backend best practices.

Backend Developer (Freelance – Remote)**Aug 2023 – Sep 2023**

- Designed and implemented RESTful APIs for scalable backend services.
- Developed optimized data models using SQL and NoSQL databases.
- Handled request validation, business logic, and performance optimization.
- Applied MVC architecture and Microservices principles.

EDUCATION

FUTURE UNIVERSITY IN EGYPT

Bachelor of Computer Information Technology | 1/9/2019 - 23/6/2023

CINCINNATI UNIVERSITY

Bachelor of Computer Information Technology | 1/9/2019 - 23/6/2023

CERTIFICATE

Project Management Professional (PMP) – PMI & EYOUTH (2025 – 2026)

Microsoft Machine Learning Engineer – MCIT Egypt (2025 – 2026)

Artificial Intelligence Certificate – British University in Egypt (2025)

Artificial Intelligence Certificate – Zewail City of Science & Technology (2023)

Angular Framework Certificate – AITB (2023)

LANGUAGE

Arabic (Native)

English (Fluent)

SOFT SKILLS

Problem Solving	Time Management
Technical Troubleshooting	Attention to Detail
Team Collaboration	Stakeholder Support
Communication	

TECHNICAL SKILLS

Backend Development		
Java	Request Handling & Validation	
Spring Boot	Business Logic Implementation	Performance Optimization
RESTful APIs	MVC Architecture	Scalability & Reliability
API Design & Integration	Microservices Architecture	
Databases & Data Management		
SQL	Database Design	Query Optimization
SQL Server	Data Modelling	
NoSQL Databases	Schema Optimization	
Software Engineering		
Software Development Lifecycle (SDLC)	Application Development & Maintenance	Clean Code Principles
System Analysis & Design	Debugging & Troubleshooting	Code Review
		Testing & Maintenance
Cloud & DevOps		
Application Deployment	Containerization (Docker – basic to intermediate)	Server & System Reliability
CI/CD Concepts		

IT & Infrastructure

Biometric Attendance Systems
(Fingerprint Scanners)
SQL Server Integration

Security Camera Systems
Hardware & Software Troubleshooting
Network & Printer Support

Help Desk Support

Security & Systems

Data Security Best Practices
Access Control & System Reliability

Secure API Design
System Monitoring

Tools & Technologies

Git
SQL Server

Backend Development Tools
Debugging Tools
